2020 changes to FORMOSA SRT™ PLATE HULL and rebranding.

We're proud to introduce our final stage for the transition to the Formosa SRT™ plate hull which simplifies the boat range and options including a bold unifying rebrand.

The Formosa SRT™ is a skilfully engineered plate boat hull, which combines over 20 years of boat building experience and the very best of proven plate boat design, making the SRT Hull a clear leader in performance, innovation, quality and value.

The hull gives you a great balance between a dry, quiet and soft riding hull, and the ultimate level of stability at rest. Formosa's wide hull and high sides mean you get a much larger deck which is safe and stable in which to enjoy a comfortable day out with your mates or family.

2019 SRT™ release saw a combination of the very best designs from the SEA-ROD and Tomahawk brands to create one exceptional Hull:

- A new degree of deadrise, custom-built cambered strakes and large reverse chine all create an enhanced hydrodynamic lift and superior traction.
- Features include a stronger Lock-cell hull and deck structure with a **Quad4™ Water Ballast option** available across the entire boat range.
- Formosa's innovative **Step-Down Active Transom** design offers smart storage solutions, easy on-board battery access and transom design options for the best water access on the market. Choose from Full Access, Dual Access, Single Access and Closed Access with a flush folding transom door and seating systems for extra fishing platforms.

2020 SRT™ release - selecting a Formosa boat is now easier with:

- one SRT™ Hull designed to handle all waters (no Classic or Offshore options)
- a refined list of optional extras (such as the introduction of the PRO DECK™ Upgrade)
- new and improved boat models.

We understand our customer's needs and what it takes to build a plate boat to tackle Australia's boating environment, so we now offer on each boat:

1. PRO DECK™ available on all boats
2. Flush Folding Transom Door
3. Welded Aluminium Rod Holders
4. Premium Sea-Star Hydraulic Steering with Genuine Outboard Hoses
5. Formosa's Step Down Active Transom design
6. Every Formosa SRT™ Hull is built with 5083 High Tensile bottom sheets
7. Each model includes selected options as standard, giving customers more value.

For more information, download the 'Full Feature List' of each model online:
www.formosamarineboats.com.au/boat-range/

PRO DECK™ Upgrade

For Formosa's True Aluminium Self-draining Deck, select a PRO DECK™ Upgrade on boat sizes 495 to 635. Boats 675 and larger come standard with PRO DECK™. Choose between the PRO DECK™ Carpeted with marine-grade carpet for cool comfort underfoot or PRO DECK™ Checker Plate, both currently of the same value.

The Formosa SRT™ Brand

The Formosa team are driven to produce leading-edge aluminium boat designs, so a harder, faster, stronger graphic for the Formosa SRT™ Hull was essential. Born to perform, the Formosa 'Racing Stripes' and the sleek 'Formosa SRT' together will now be a standard Graphic on every boat and will feature in future promotions replacing the Formosa Marine Marlin logo.

New and Improved Models

Not only a hull upgrade but we've revisited each model for improved looks and practicality.

Formosa has built the **Side Console** with plate boat construction and well-considered storage solutions to help keep your deck area clear of obstructions and allows for a well-appointed open fishing platform.

Smart Side Console storage solutions include:

- A high casting deck with strong aluminium structure allows for a large **Storage Compartment**, big enough to store a **70L icebox**.
- Storage compartment is designed with a **drainage channel** to direct water away.
- Formosa provides an **Electric Motor Mount standard** on all Side Consoles.
- A **Battery Box** behind the casting platform was added to store Batteries for your electric motor.
- The sleek and curved **Aluminium Console** allows for a **deep storage shelf** underneath.
- The Console facia has **cup and phone holders** and **room for mounting flat-screen electronics**.
- The **Driver's Sliding Seat Box** with tackle box mounted underneath is designed to move along the pocket, forward, backward and away for greater utilization of deck space.
- **Large deep side pockets** allow for a great amount of easy access to storage along the deck and welded high to allow space underneath for your feet for casting and retrieving your fish.
- **Active Transom design for battery storage.**
- Grab a Formosa 70L icebox now available.

Introducing the Formosa SRT™ **Cuddy Cab** which has replaced the Runabout model. The Cuddy Cab offers a forward cabin area on top of a raised deck providing more storage undercover than the Runabout, while still providing a walkthrough to the bow and a large open deck space out the rear.

The walkaround **Centre Cabin** has a wider cabin design which adds more deck space upfront, more structure for a flush-mounted throttle and large driver console to suit flat-screen electronic displays. Now standard on the Centre Cabin is the **folding rocket launcher with hardtop visor, electric motor mount, two cabin shelves** and a storage area for a portable toilet.

The **Centre Console** has seen a sleek redesign of the console and optional T-Top with rocket launcher and hardtop visor. The driver's console will fit the latest flat-screen electronic displays and gives improved storage solutions such as a new folding seat option out front. This model also features a Formosa designed windscreen which folds forward for an unobstructed view and an extra storage compartment with drainage under the front deck. Choose from two Twin Seat Box options with icebox access.

The Formosa SRT™ **BOSS Console** has a large lockable storage area allowing room for a private toilet, a dry space for gear or even a place to seek shelter from a downpour of rain.

There is no doubt that Formosa Marine's continuous enhancements add massive quality and value for anyone who wants to venture off-land and enjoy the Australian waters.
