

NEW MODEL

FORMOSA GRT455

COMPACT AQUATIC WEAPONRY™

Formosa launches back into the small boat market, delivering Formosa toughness, stability, internal volume and ride in a small production plate range that is unique among Australian production boats. With 4mm 5083 high tensile bottom sheets, 4mm plate sides and fully welded top decks, the Formosa GRT range is a step well above your typical tinnie. With a generous V-hull, large beam and big negative reverse chine, the Formosa GRT delivers strength & performance, with incredible stability. Coupled with plenty of internal freeboard from high sides and clever storage, the Formosa GRT packs a lot of value into a GRT little boat!
